Nowadays the variety of the communications and consumer electronics devices are growing. The electronics experts feel that is hard to catch up with repairs of such new technology. I believe that everyone agrees that in the past 10 years the electronics repair profession in under very rapid development.

In 2005 we started to publish the Practical Electronics (Elektronika Praktika) magazine for TV repair services and other electronics specialists. This magazine contains information about relevant trainings and repair tips as well as useful informations regarding CRT, LCD, Plasma TVs an other consumer electronics and introducing new technologies.

Our magazine is distributed in a closed loop system. The magazine can be only purchased from the editorial office by order.

The magazine is published in every 3 months on a B5 format with 64 pages in Hungarian.

Appearance months: January, April, July and October.
